WORK EXPERIENCE

UI Developer
Quicken Loans Inc - Detroit, MI - August 2014 to Present

UI Developer

Bank Of America, Wilmington, DE   -   Wilmington, DE - April 2013 to July 2014

is largest online retail mortgage lender and the second largest overall retail lender in the United States. It has become the headquarters in Detroit, Michigan since 2012. I worked as a Senior Web Developer for MyQl Origination Department. The main objective of the project was to setup and implement MyQl portal for end clients in their daily operations.

Responsibilities

● Interacted with business analyst to understand the requirements to ensure correct UI modules been built to meet business requirements.

● Involved in complete life cycle of software development including designing, developing, testing and deployment of application using agile methods.

● Designed the front end applications for MyQL portal using web technologies like HTML5, XHTML, CSS, JavaScript.

● Extensively involved design discussions and user experience sessions to provide inputs on the layout and UX.

● Used JQuery to make the MyQl application highly interactive and used JSON objects effectively for efficient client side coding.

● Transformed design mock-ups for MyQl into cross-browser compatible HTML/CSS layouts and implemented dynamic elements and reusable libraries with JavaScript, JQuery and Angular.js

● Experience in working with npm package manager tools like node js and built tools like gulp.

● Used Selectors, Events, Ajax and Dom Manipulation modules in JQuery for updating content on DOM nodes.

● Worked on JavaScript frame work (Angular JS, Bootstrap) to augment browser based applications with MVC capability.

● Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON and XML.

● Involved in hand coding in HTML5, CSS and jQuery for table less design with Accessibility standards.

● Good Knowledge on Progressive enhancement and Responsive Web Design.

● Used GitHub for version control and TFS for defect tracking and Confluence for content Management System.

● Maintain, enhance, and recommend solutions that best suit business and technology needs from UI standpoint.

● Creating cross-browser compatible and standards-compliant CSS-based page layouts.

● Worked closely with Photoshop designers to implement mock-ups and the layouts of the application.

● Built pages from Photoshop mockups using JavaScript, JQuery, CSS, HTML and Angular JS.

● Used Chrome developer tools and Firebug in Firefox effectively for debugging and correcting errors.

● Worked closely with PHPDevelopers and Midware developers in cordinating and implementing the business requirements.

● Contribute positively to the overall team dynamic; participate in stand-up meetings, planning and design sessions and other business-development working.

Environment: HTML, HTML 5, CSS3, JavaScript, JQuery, AJAX, JSON, XML, Bootstrap, Angular JS, GitHub, TFS, Confluence.
